

**Doc. 11**

23 August 1949

## **Role of the Council of Europe in the economic field**

**Motion for a resolution**

tabled by Mr Aidan CRAWLEY and other members of the Assembly

Consultative Assembly of the Council of Europe,

recognising that multilateral trade can only be established gradually in the world,

urges that an area be established in Europe in which currencies other than the dollar are freely exchangeable and

recommends a revision of the European payments scheme to that end;

it further recommends that within such a scheme a common policy be adopted for balancing the dollar payments of the countries concerned.
