

Order 199 (1962)¹

Smoker's Cancer

Parliamentary Assembly

The Assembly,

Considering that certain medical circles believe that smokers are particularly subject to throat and lung cancer;

Having learned that the Platt Commission has carried out an important study on this subject in the United Kingdom;

Having regard to the fact that similar studies are in progress in several Council of Europe countries;

In view of the concern aroused among the general public by such investigations,

Instructs the Social Committee to look into the matter and to submit a report on it at the earliest possible date.

1. 7th sitting, 18th may 1962.
