1. This Recommendation was adopted by the Assembly at its 9th Sitting, on 20th April, 1956 (see [Doc. 494](#), draft Recommendation of the Committee on Economic Questions).

*Recommendation 95 (1956)*

Considering that the low per capita income and savings capacity of the countries concerned render the provision of substantial capital from abroad essential for the successful implementation of these programmes and that private sources alone cannot be expected to furnish adequate financing for the investments required, particularly as regards infra-structural projects;

Taking into account the importance to the free democratic world of strengthening the economic position of Southern Europe and of improving the economic and social conditions of the populations of Greece, Italy and Turkey;

Considering that the free democratic world has a particular responsibility to assist these countries and to give concrete evidence of European solidarity,

Recommends to the Committee of Ministers the creation of a European Development Fund to provide capital in the form of grants and/ or loans on appropriate terms for development projects in Greece, Italy and Turkey.

With this in view the Committee of Ministers is urged :

- a. to request Member Governments to contribute financially towards the creation of such a Fund, and to take all necessary steps to set up the framework for the said Fund;
- b. to request the O.E.E.C. to undertake the administration of the Fund;
- c. subsequently to examine, in consultation with the O.E.E.C, the possibility of securing the collaboration of the United States Government in the financing of the tasks developing upon the Fund, as European resources may be inadequate.
