

Doc. 13092
13 March 2013

Gender equality in the countries of the former Yugoslavia

Amendment¹ No. 7

In the draft resolution, paragraph 7, at the beginning of the first sentence, insert the following words:

"Besides Slovenia, where employment of women is traditionally high and above the European Union average,"

Explanatory note

The participation of women in the labour market in Slovenia is almost equal to the ratio of employment of men and they are mostly employed full time. This is due to a good and well-organised system of public kindergartens.
