

Doc. 13531  
23 June 2014

## The large-scale arrival of mixed migratory flows on Italian shores

### Amendment<sup>1</sup> No. 4

*In the draft resolution, delete paragraph 9.2.*

#### *Explanatory note*

Identifying migrants and asylum seekers through the use of DNA records in addition to fingerprints would be disproportionate and discriminatory. DNA records are particularly sensitive data which may only be used to identify individuals for the prevention, detection and investigation of criminal offences.
