

Doc. 14288
27 April 2017

Technological convergence, artificial intelligence and human rights

Amendment¹ No. 4

tabled by the Committee on Legal Affairs and Human Rights

In the draft recommendation, before paragraph 9, insert the following paragraph:

"The Assembly reiterates its call made in Resolution 2051 (2015) on all member States and observer States, as well as States whose parliaments have observer status with the Assembly, to refrain from any automated (robotic) procedures for selecting individuals for targeted killings or any sort of injury based on communication patterns or other data collected through mass surveillance techniques. This should be true not only for drones but also for other combat equipment with artificial intelligence systems, as well as other equipment and/or software which might potentially inflict damage on people, property, personal data or information databases, or interfere with privacy, freedom of expression, or the right to equality and non-discrimination."

1. 2017 - Second part-session
