

Doc. 14401
09 October 2017

The activities of the Organisation for Economic Co-operation and Development (OECD) in 2016-2017

Amendment¹ No. 7

tabled by the Committee on Social Affairs, Health and Sustainable Development

In the draft resolution, paragraph 11.3, after the words “those leaving the education system”, insert the following words:

“, in particular among those leaving the education system early”.

Explanatory note

Mismatches between business demands and existing skills pool are particularly high among those affected by early school dropouts, according to the OECD’s research. These penalise workers’ employability all their life.
