

Doc. 14521
23 April 2018

Climate change and implementation of the Paris Agreement

Amendment¹ No. 8

In the draft resolution, replace paragraph 6.8 with the following paragraph:

"establish the adequate regulatory framework for the private sector to thrive and become a leading actor in the transition to a decarbonised economy, facilitating its contribution to achieving domestic and international climate goals;"

Explanatory note

The private sector has demonstrated that it is ready to take action to implement the Paris Agreement and to drive the transition to a more sustainable economy. The role of the public sector is therefore to provide the necessary framework and incentives for private actors to better play this role.
