

Doc. 14955
02 October 2019

A legal status for "climate refugees"

Amendment¹ No. 4

In the draft resolution, at the end of paragraph 4, insert the following words:

"making a clear distinction between real climate change and a self-induced overpopulation causing socio-cultural immigration in foreign social systems. Those self-caused problems can and must only be solved by the inhabitants of the specific country and area of origin."

Explanatory note

The concept of climate change is abused for the purpose of outsourcing homemade overpopulation problems. However, the outsourcing of the socio-culturally determined overpopulation problem only relocates the same problem to host countries.

If the host country behaviour does not change, their welfare securing systems and socio-cultural communities will soon collapse.
