

Doc. 15212
25 January 2021

Covid-19 vaccines: ethical, legal and practical considerations

Amendment¹ No. 2

In the draft resolution, after paragraph 7.2.5, insert the following paragraph:

“ensure that every country is able to vaccinate their health-care workers and vulnerable groups before vaccination is rolled out to non-risk groups, and thus consider donating vaccine doses or accept that priority be given to countries which have not yet been able to do so, bearing in mind that a fair and equitable global allocation of vaccine doses is the most efficient way of beating the pandemic and reducing the associated socio-economic burdens;”

Explanatory note

A failure of global solidarity will not only cost thousands - possibly millions - of lives, it will also put unnecessary strain on the global economy.
