

Doc. 15444
26 January 2022

Beating Covid-19 with public health measures

Amendment¹ No. 7

In the draft resolution, paragraph 9.2.1.1, delete the words "(progressively moving to masks of FFP2 standard if possible)".

Explanatory note

Associations such as the German Society for Hospital Hygiene e. V. have repeatedly warned that mandating FFP2/N95 masks in the general public can be counterproductive because those masks only offer better protection when worn correctly. Otherwise, protection can be worse. See <https://www.krankenhaushygiene.de/pdffdata/2021-07-07-Masken.pdf>
