Global peace under threat: halting the humanitarian catastrophe in Gaza and addressing the wider conflict in the Middle-East

Amendment¹ No. 24

Mr George LOUCAIDES, Cyprus, Group of the Unified European Left

In the draft resolution, paragraph 1, replace the third sentence with the following sentences:

"The military aggressions against Iran by Israel, followed by the United States, constitute a violation of international law. The retaliation by Iran led to an eruption of open military hostilities between Israel and Iran in June 2025, and the direct military intervention of the United States in this conflict targeting Iran's nuclear facilities. This resulted in hundreds of civilian casualties and represents a further alarming development which could lead to an even wider conflagration with devastating consequences for human suffering and the maintenance of international peace and security at a time when power politics seem to have overridden the system of global governance based on international law."
