

Doc. 16423
23 June 2026

Ensuring sustainable food security in times of crisis: strengthening resilience and access to food

Amendment¹ No. 4

Mr Oleksii GONCHARENKO, Ukraine, European Conservatives, Patriots & Affiliates

In the draft resolution, after paragraph 3, insert the following paragraph:

"The Assembly further underlines that the destruction of the Kakhovka Dam by the Russian Federation has had devastating and long-lasting consequences for agricultural production, water security and the environment. The flooding of fertile agricultural land, the collapse of irrigation systems in southern Ukraine and the contamination of affected areas have significantly undermined food-production capacities and created risks for regional and global food security. The Assembly stresses the importance of documenting these damages and ensuring full accountability under international law."

Explanatory note

Self-explanatory

Tabled by:

GONCHARENKO Oleksii, Ukraine, ECPA
