Violent pornography: a test for human rights

Amendment¹ No. 30

Mr Rónán MULLEN, Ireland, Group of the European People's Party

In the draft recommendation, paragraph 4.2, replace the words after "neurological impact of" with the following words:

"pornography as well as on real-world correlation between consumption of pornography and violence against women, men and children."

Explanatory note

Important not to exclude co-operation and information sharing about pornography generally because, even when not ostensibly violent or extreme it may contribute to violence directly or through gradual and progressive addiction and recourse to more extreme content.
