

Resolution 34 (1953)¹

Reply to the Report on the activities in Europe of the World Health Organisation

Parliamentary Assembly

The Assembly has taken note with keen satisfaction of the first Report transmitted to it by the World Health Organisation. It warmly welcomes the Report, believing that this mode of co-operation will prove most valuable in the future.

The Report has afforded the Assembly an opportunity of studying the work of the World Health Organisation and of assessing the achievements of the latter in its particular sphere.

The Assembly fully approves of the arrangements made for the exchange of information and technical assistance, and hopes that these arrangements, enabling the countries concerned mutually to benefit from their varied experience, will be progressively extended and thus contribute to international solidarity in the sphere of public health.

1. This Resolution was adopted by the Assembly at its twenty-first Sitting, on 23rd September, 1953 (see [Doc. 187](#), Report of the Committee on Social Questions).
