A. Draft Resolution .....	2

## A. Draft Resolution

1. Sound tax systems are the cornerstone of public finances: they underpin democratic governance, State authority, macroeconomic stability and social cohesion. This delicate balance relies on tax compliance by all tax payers, be they individuals or enterprises. It is extremely worrying that certain activities by secrecy jurisdictions, tax havens and offshore financial centres facilitate massive tax avoidance, evasion and fraud which cause serious harm to the public interest of all Council of Europe member States, as well as many other countries, in particular the developing ones.

2. The Parliamentary Assembly is concerned about the extent of the offshore financial system, in particular tax havens, and its impact on public finances, stability of financial markets and society at large. With all countries having surrendered some of their sovereignty to globalisation and the global economy, tackling global distortions due to harmful or predatory tax practices is both a moral duty and a common cause.
3. Thanks to growing public outcries, international co-operation has intensified, notably at the G20 level, to tackle the root problems concerning tax havens: bank secrecy, lack of transparency and effective public oversight, regulatory dumping, predatory tax arrangements and abusive accounting techniques within multinational companies (notably abusive transfer pricing). However, the situation is far from satisfactory and further

4. The Assembly therefore calls on the Bank for International Settlements (BIS), the International Monetary Fund (IMF) and the Organisation for Economic Co-operation and Development (OECD) to step up their action – complementing each other's efforts whenever feasible – on measuring and analysing financial flows to and from the offshore financial centres and jurisdictions deemed tax havens, as well as their interaction with the mainstream economic activity of other States.

- 5.2. study ways of strengthening corporate social responsibility and ethics and make proposals for defining more clearly the responsibilities of multinational enterprises towards the society in all countries where they operate;
- 5.3. issue recommendations to their member States to introduce country-by-country reporting with a view to increased corporate tax accountability and disclosure of financial information (notably on costs, profits and taxes paid) concerning the activities of multinational companies in all countries in which they operate and across all business sectors, starting with the financial sector.

*In the draft resolution, after paragraph 5.3, insert the following paragraph:*

6. In this context, the Assembly welcomes the entry into force, in 2011, of the Convention on Mutual Administrative

Assistance in Tax Matters as amended by the Additional Protocol (CETS No. 208) after the launching of it in 2010. The Council of Europe and the OECD should vigorously promote this instrument, not only among their member States and their dependent territories, but also among their economic partners across the globe. Moreover, they could jointly assess the implementation of this convention in the near future.

7. The Assembly hails the outcome of the G20 Cannes Summit (3-4 November 2011) where the leaders of G20 countries committed to sign the amended Convention on Mutual Administrative Assistance in Tax Matters, strongly encouraged other jurisdictions to join the convention and undertook to “consider exchanging information automatically on a voluntary basis as appropriate and as provided for in the convention”.
8. Moreover, the Assembly strongly supports steps taken by the European Union towards gradual harmonisation of tax practices among its member States and, in particular, efforts to introduce automatic exchange of information for certain categories of income and capital as from 2015. It considers that this process could be accelerated and that similar efforts should be undertaken by non-European Union countries.

9. In the same spirit, the Assembly urges the European Union member States to support efforts to put in place country-by-country reporting obligations (notably on costs, profits and taxes paid) in respect of accounts of multinational enterprises that are registered or operate in the European Union. This practice should gradually be extended to all Council of Europe and OECD member countries, as well as G20 member States.

10. With a view to holding governments to account in tax matters, the Assembly urges national parliaments to:
  - 10.1. examine domestic tax standards, policies and collection procedures in order to spot artificial tax minimisation techniques which may be legal but not ethical, and
